The 'Just Right' Project

The activity monitoring system
that supports independence

What is Just Checking?

Bob

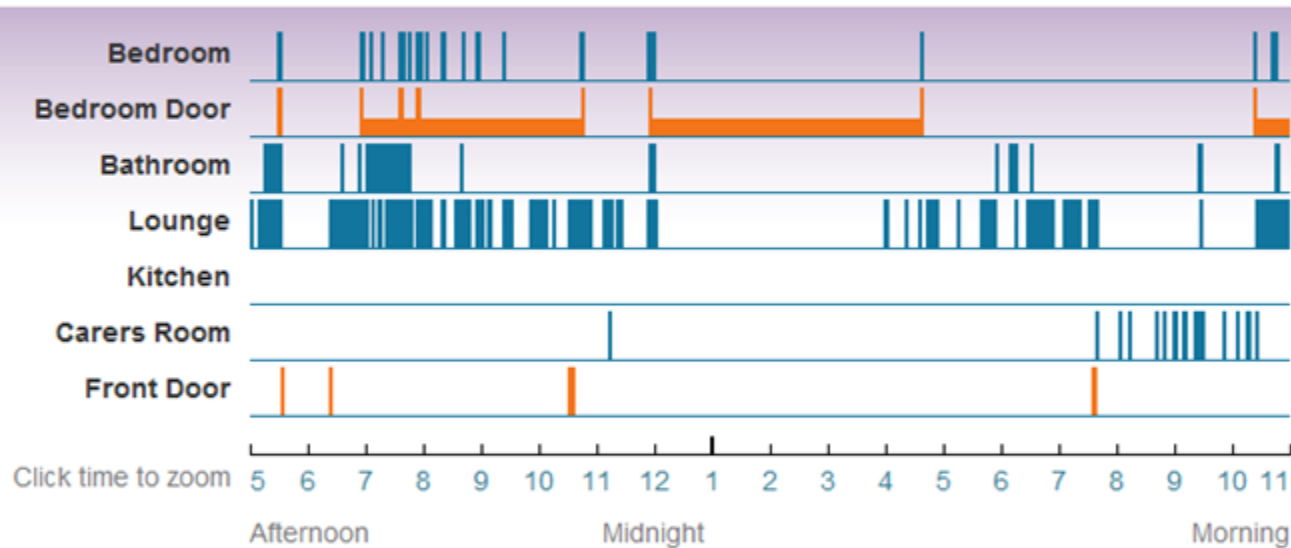

- Recent move to own flat
- Waking night to cover settling in period (believed Bob needs help with toilet)
- Review night times
- Family resistant to reduction in night cover.

Similar pattern. Bob sleeps 10.30pm – 10am, with assistance to toilet 2am

Outcomes - Bob

- Call on carer at night varied from 0 – 2 times for toilet visit and return to bed.
- Evidence to reduce night support from waking to sleep-in nights:
 - increased independence for Bob
 - annual cost savings of **£32,000+**
 - lifetime cost savings of **£1million +**
- Added bed occupancy sensor to alert sleep-in night carer

Getting support 'Just Right' in learning disability services

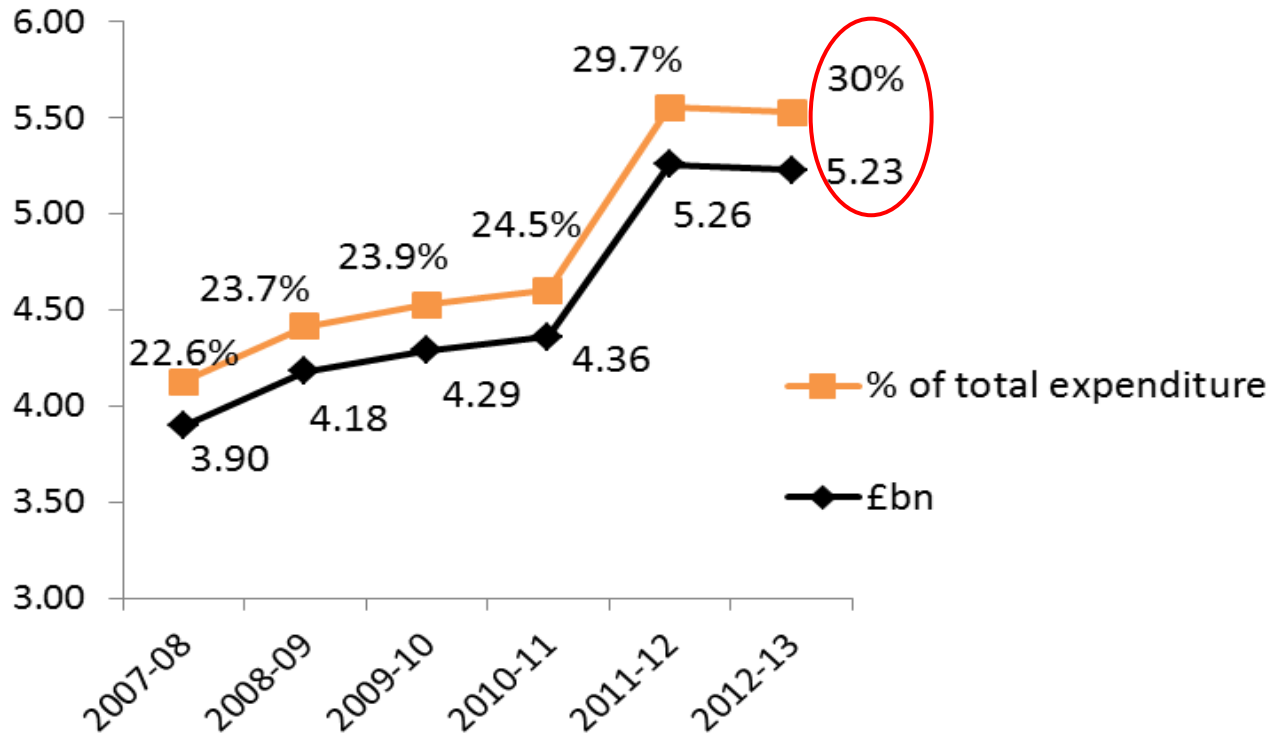

Expenditure Over Time

England:

Adult social care expenditure on clients with LD has increased from 22% in 2006-07 to 25% in 2010-11 and now stands at 30% in 2012-13.

£1.3bn more over 6 years

- Proven technology
- SBRI funding to replicate at scale
- Deliver improved care for the 86,000 people who need supported living services, at lower, more sustainable cost
- Improve capacity to meet growing demand

11 local authorities

Project Aims

- Identify and realise significant efficiency savings in care within supported living and residential care for adults with learning disabilities
- Improve outcomes for service users
- Develop more sustainable services, with training for care providers
- Build concrete evidence and a model for other local authorities

Results expected summer 2015.
