Parkinson's Trial - 2013

70%

Daily use rate

- Increased medications adherence
- Improved health behaviours

The use of smartphone and internet assisted self-management and adherence tools to manage Parkinson's Disease – The SMART-PD trial protocol.

- Clinicians want this
- So do patients
- Requires collaboration to succeed
- Focus on breadth of clinical outcomes

“I'm convinced uMotif is going to help many people with lots of different conditions and may in time help cure some.”

Parkinson's patient – 14 Oct 2014
