

Small Business Research Initiative (SBRI) Healthcare Programme Competition 23 Briefing Event

*The***AHSN***Network*

@AACInnovation

Agenda

Time	Topic	Presenters
9:30 – 9:35	Welcome and introductions	
9:35 – 9:50	Introduction and overview of the SBRI Healthcare Programme and Competition 23	<i>PMO</i>
9:50 – 10:10	Child Health - overview of the challenges	Professor Paul Dimitri
10:10 – 10:30	Q&A session	
10:30 – 10:40	The AHSN Network	<i>Helen Hoyland, AHSNs</i>
10:40 – 10:45	Insights and tips from successful Phase 1 award holders	<i>Carolina Bell, Neurovirt</i>
10:45 – 10:55	The application and assessment process	PMO
10:55 – 11:25	Q&A session	
11:25 – 11:30	Closing remarks	

Housekeeping

- Thank you all for taking the time to join
- Feel free to ask questions in the Q&A box as we go along, and we will answer them in the Q&A sessions
- Please flag any technical issues in the chat
- The slides and the recording will be uploaded on SBRI Healthcare website
- For further enquiries: sbri@lgcgroup.com

Small Business Research Initiative (SBRI) Healthcare Programme

Francesca Troiani

Senior Programme Manager, SBRI PMO

*The***AHSN***Network*

@AACInnovation

About SBRI Healthcare

- Pan-government, structured process enabling the public sector to engage with innovative suppliers
- AAC programme managed by LGC Group & supported by the Academic Health Science Network (AHSNs)

Improve patient care

Increase efficiency in the NHS

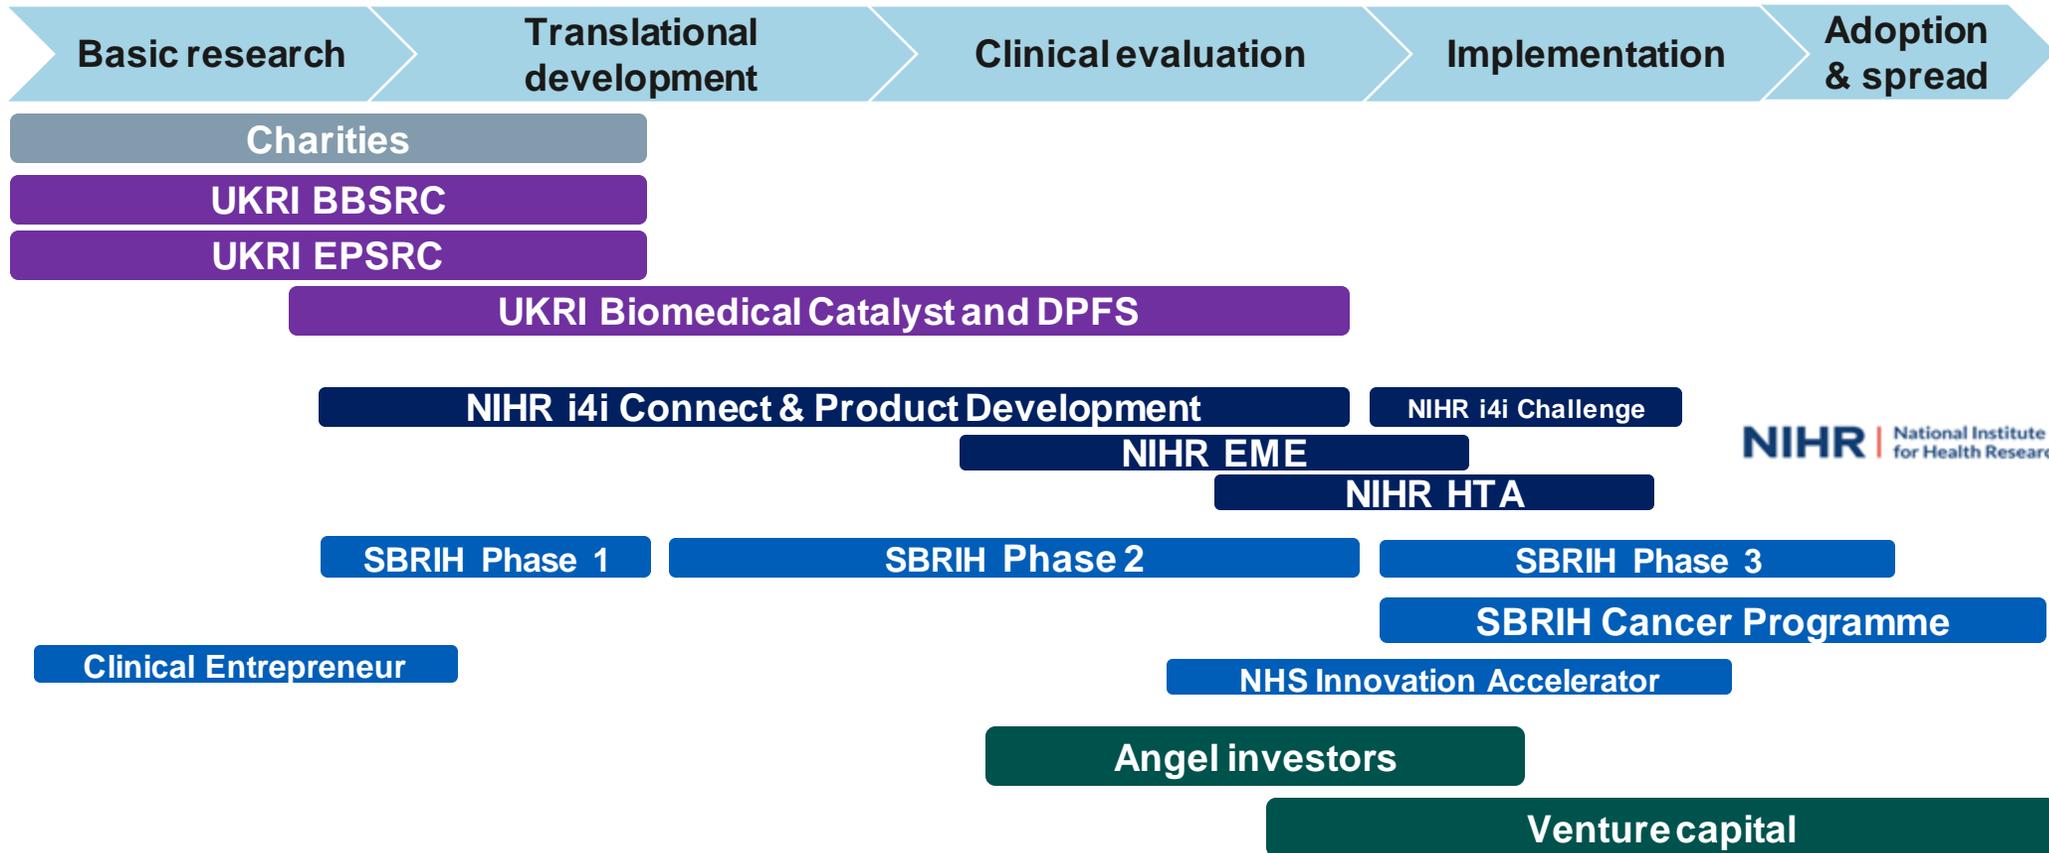

Enable the NHS to access new innovations through R&D that solve identified healthcare challenges and unmet need

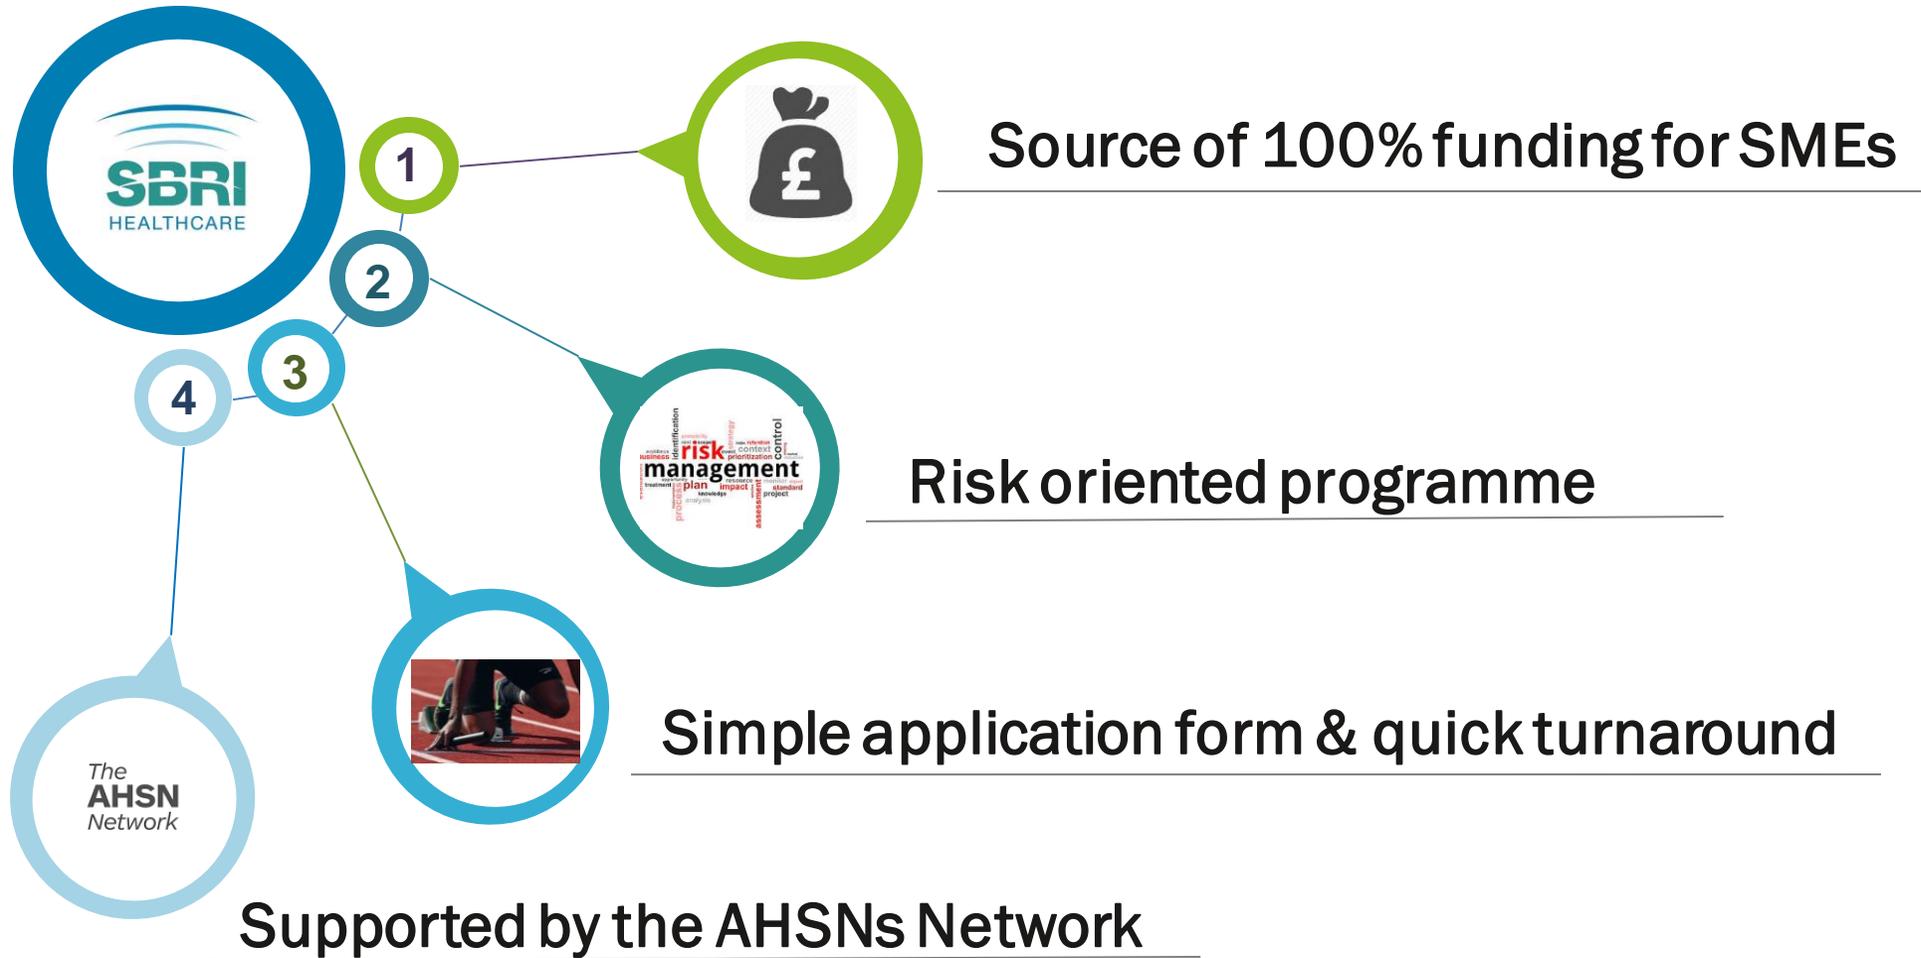

Bring economic value and wealth creation opportunity to the UK economy

Funding landscape

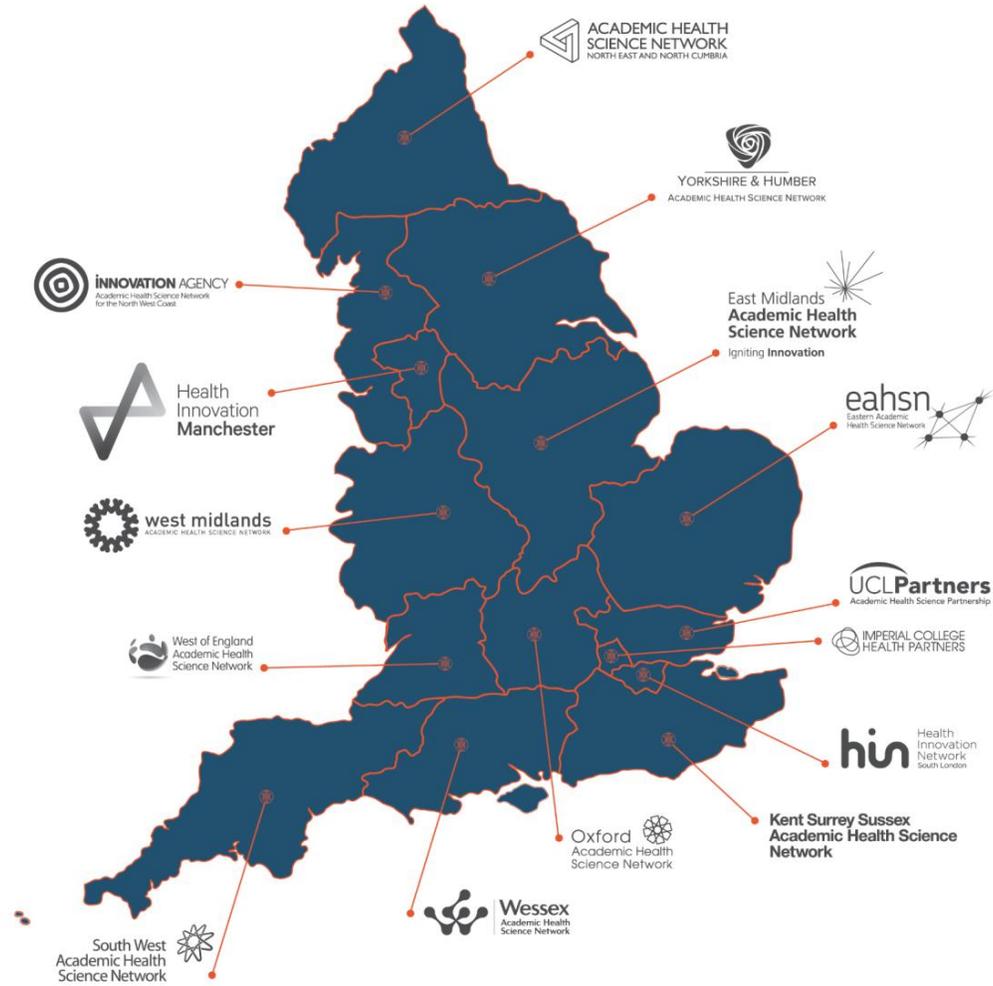

NIHR | National Institute for Health Research

The AHSN network

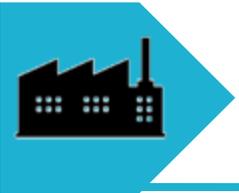

A
connected
'Network of
Networks'

Themed competitions to address identified unmet NHS challenges at early and late stage of innovation

- Particularly suitable for SMEs, but any size of businesses is eligible
- Other organisations from public and third sectors (including charities) are eligible as long as the route to market is demonstrated
- Based anywhere in Europe

At early stage of innovation the Programme has a phased development approach

- Phase 1, feasibility project (6 months, up to £100K, NET)
- Phase 2, development project (12 months, up to £800K, NET)

Phase 1 and Phase 2 expected exit points

Establish the technical and commercial, feasibility of the proposed technology:

- Feasibility technical study
- Market validation
- Business plan
- Clinical partners identified
- Evidence generation plan for adoption
- Development of PPIE strategy
- Health inequalities impact assessment

Phase 1

- Minimal Viable Product developed
- Early clinical evidence gathering to demonstrate accuracy (and safety)
- Commercialisation strategy: business model, price strategy
- Health economics
- Evidence gathered towards regulatory documentation
- Implementation plan for adoption
- Next stream of funding identified / investment readiness if applicable
- Demonstration of strong involvement and engagement with patients and members of the public

Phase 2

Portfolio snapshot

306
supported

£140m+
Total invested

Portfolio snapshot

92
Companies with commercial revenues

64
products exported

79
Companies with sales in the NHS

284
IP granted

£73m+
revenue generated

£684m+
Private investment leveraged

2,235
jobs created/retained

1,762
New collaborations established

>7.7m
patients involved through sales and trials

19,957
Sites accessed through trials or sales

Portfolio snapshot

LapAR is a laparoscopic training platform to democratise access to high fidelity laparoscopic surgical training

- Adopted by 8 deaneries for deanery-wide surgical training
- Adopted by 2 multinational medical technology companies (Olympus, Johnson and Johnson)
- Used to perform over 6,000 simulated surgical procedures since 2020
- Early evidence to show a 41% reduction in time to operate as a result of improved skill and confidence
- Health economics studies suggest the technology will result in a £115m per year cost saving to the NHS
- Exported to 4 continents

iPLATO transforms access to health services and prevention through intelligent care navigation and personalised patient engagement

- Personalised engagement reaching 15m people
- 45 CCGs have commissioned the iPLATO Platform
- NHS Digital Assured App with 2.5m patient users
- iPLATO recently merged with Huma Therapeutics who has raised \$250m

The SME voice

“

Working with SBRI has been great, I have recommended many other to apply to future programmes due to the support and connections created through the programme. Funding is great, connections are priceless.
Ben Wilkins, CEO GoodBoost

“

SBRI Healthcare allowed us, as an SME, to build a product harnessing the latest technology, and to work with leading academics and clinicians in three NHS trusts.”

Rebecca Bright, Co-founder and Director Therapy Box

Support

PRE-COMPETITION	Launch webinars, drop-in sessions and clinics
IN-COMPETITION	NICE Metatool Webinar support on: what a good application looks like, Patient and Public involvement, commercialisation, IP, finance, impact, tailored sessions etc
IN-PORTFOLIO	Investment readiness programme, showcase events, webinar series on regulatory landscape, roadmap to the NHS, health economics, DTAC, peer to peer support, women in Healthtech Leadership programme
IMPACT	Case studies, annual survey and annual report

Competition 23 Child Health

Categories

Long term conditions

- Asthma
- Epilepsy
- Diabetes

Prevention of ill-health

- Obesity
- Oral health

- 1 **Competition launch**
9th August 2023
- 2 **Competition close**
13th September 2023
- 3 **Selection Panel**
12th December 2023
- 4 **Contract start**
1st February 2024

Child Health

Professor Paul Dimitri

Professor of Child Health and Consultant in Paediatric Endocrinology

NIHR National Children's Specialty Lead

Vice President for Science and Research, RCPCH

Director, NIHR Children and Young People MedTech Cooperative

*The***AHSN***Network*

@AACInnovation

1/3

UK population is made up of children and young people

4.2 million

Children live in poverty in UK

1.7 million

Children have longstanding illnesses

58%

More likely that deprived children and young people attend A&E than the least deprived

25%

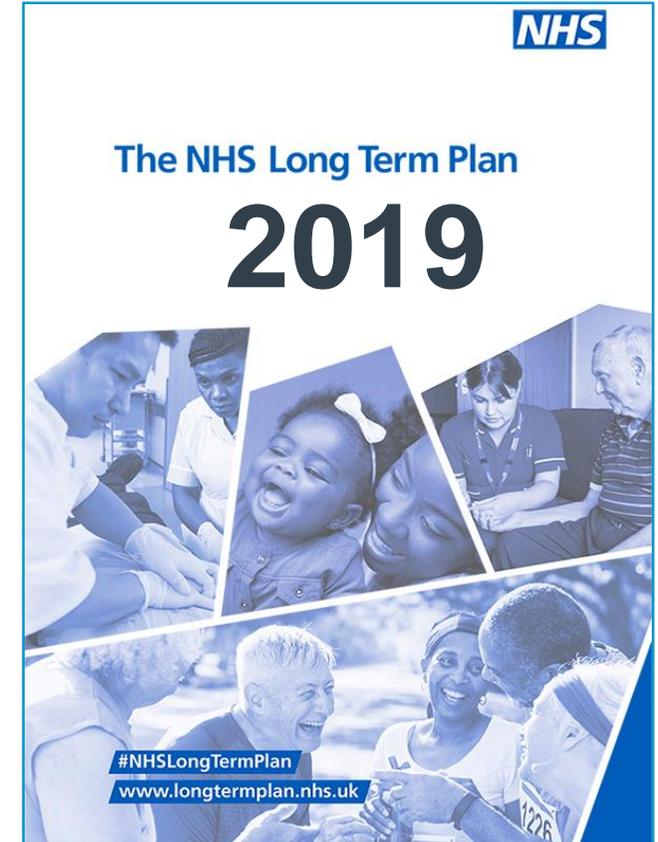

A&E attendances are accounted for by CYP

94%

Of emergency hospital admissions are accounted for by children under 19 years with long term conditions

Old problems - new solutions

REDUCING HEALTHCARE INEQUALITIES FOR CHILDREN AND YOUNG PEOPLE

CORE20
The most deprived 20% of the national population as identified by the Index of Multiple Deprivation

The **Core20PLUS5** approach is designed to support Integrated Care Systems to drive targeted action in healthcare inequalities improvement

PLUS
ICS-chosen population groups experiencing poorer-than-average health access, experience and/or outcomes, who may not be captured within the Core20 alone and would benefit from a tailored healthcare approach e.g. inclusion health groups

Target population

CORE20 PLUS 5

Key clinical areas of health inequalities

1

ASTHMA
Address over reliance on reliever medications and decrease the number of asthma attacks

2

DIABETES
Increase access to real-time Continuous Glucose Monitors and insulin pumps in the most deprived quintiles and from ethnic minority backgrounds & increase proportion of children and young people with Type 2 diabetes receiving annual health checks

3

EPILEPSY
Increase access to epilepsy specialist nurses and ensure access in the first year of care for those with a learning disability or autism

4

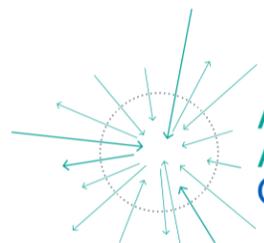

ORAL HEALTH
Address the backlog for tooth extractions in hospital for under 10s

5

MENTAL HEALTH
Improve access rates to children and young people's mental health services for 0-17 year olds, for certain ethnic groups, age, gender and deprivation

The NHS Long Term Plan

#NHSLongTermPlan

www.longtermplan.nhs.uk

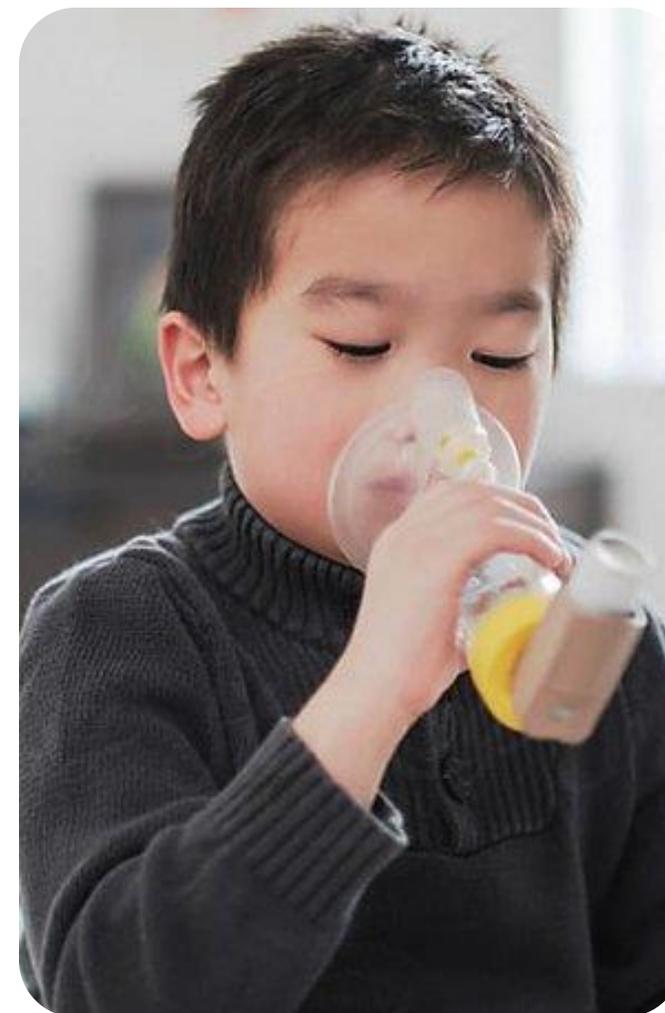

Long term conditions

*The***AHSN***Network*

Asthma

- Asthma is the most common long-term condition in CYP
- The UK has one of the highest prevalence of emergency admissions and death rates for childhood asthma in Europe
- Avoidable factors in 65% deaths
- Asthma education is lacking
- NHS Long Term Plan: to improve asthma outcomes for CYP - National bundle of care for CYP
- Worse for children and young people living in the most deprived areas
- SBRI Programme encourages innovations that support the most deprived 20% of the national population

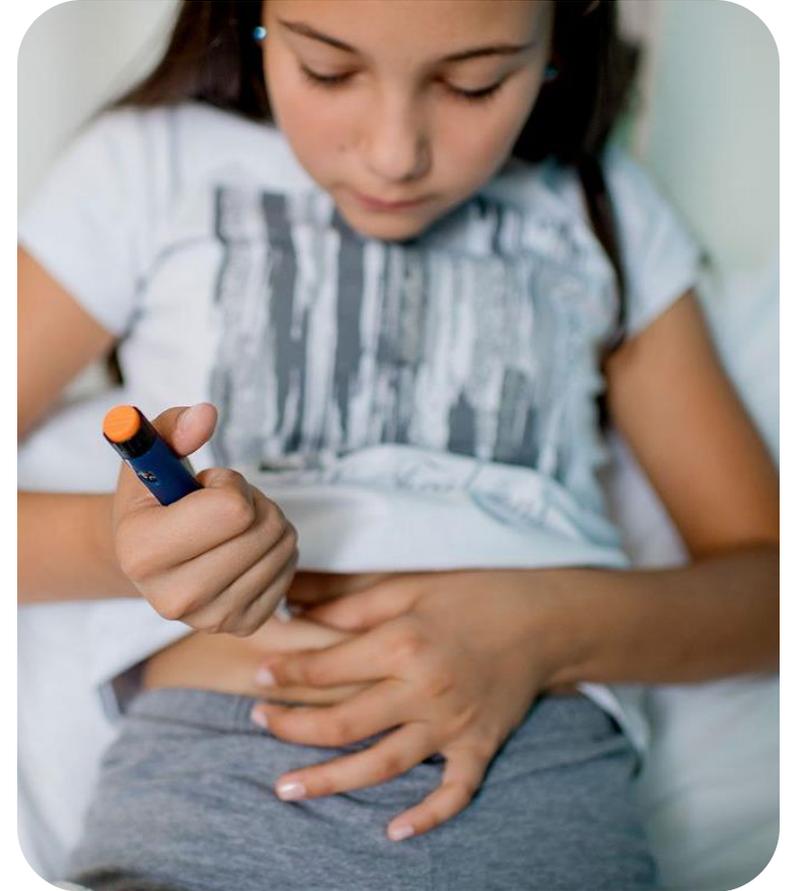

Epilepsy

- Affects an estimated 112,000 CYP in the UK
- 40-80 children die every year as a result of epilepsy
- Misdiagnosis remains, a major concern resulting in unnecessary treatment with anti-epileptic drugs
- Undertreatment for those with epilepsy is also a significant problem
 - estimates that up to 70% of people with epilepsy could be free of seizures if appropriately managed
- Poor communication continues to be an issue.
- Limited access to specialist services
- Accessing services is a challenge for those in deprived areas
- 37% of children with epilepsy have a co-existing mental health disorder

Diabetes

- In 2019 there were an estimated 36,000 children in the UK with diabetes
- Increase in T1DM co-morbidities of Type 1 Diabetes: obesity and hypertension
- Many children with diabetes also need psychological support
- Diabetes control is worse in CYP from ethnic minority groups. This will result in a much higher risk of long term complications
- Related to inequitable access to diabetes technologies which improve the control of diabetes
- Type 2 diabetes is increasing in prevalence – obesity + NAFLD
- The prevalence of T2DM is higher in females particularly those from minority ethnic backgrounds and those from the most deprived areas of England and Wales.
- There is a variation in outcomes in CYP with -requires attention

Annual Report of the
Chief Medical Officer 2012

Our Children Deserve Better:
Prevention Pays

Prevention of ill health

The **AHSN** Network

Obesity

- Nearly 1 in 4 children in the UK by age 10-11 (NCMP)
- High increase from reception year (10%)
- High risk of future complications – particularly in ethnic minority groups
- £4.2 billion + wider costs of £27 billion
- Higher prevalence (x2) in the most deprived areas
- Government pledge to halve childhood obesity and significantly reduce the gap in obesity prevalence between children from the most and least deprived areas by 2030
- CEW clinics – tip of the iceberg
- Aims to tackle through prevention
- Old problem – new solution!

Oral Health

- Tooth decay is the most common oral disease affecting children and young people in England
- CYP are consuming the equivalent of around eight sugar cubes more than the recommended daily limit
- Only 46% of children living in England saw a dentist in 2021-22 (24% of children under four)
- Tooth extraction is the most common hospital procedure in 6-to 10-year-olds
- CYP extractions due to tooth decay - £33 million
- CYP experiencing dental decay has changed little between 2013 and 2020.
- Children living in the most deprived communities experiencing poorer oral health
- Chinese and Eastern European children are more at risk.
- Exacerbated for those children living with disabilities and vulnerable children

Challenges to consider in child health technology development

- No technology for us, without us
- Consider anatomical, physiological and social changes
- Developmentally appropriate – versatility is key
- Autonomy in adolescence – who is the user
- Longevity – prevent attrition
- Personalisation – avoid one size fits all
- Consider the interface between physical and mental health

Themes:

- Epilepsy, movement and muscle disorders
- Neonatal Technologies
- Rare Diseases
- Respiratory, Sleep, and Ventilation
- Surgical Technologies
- Transition (cross-cutting theme)
- Cancer

Innovation

The National Centre for Child Health Technology

Super 7 Strategic Priorities

- Prevention and Health Inequalities
- Child Obesity
- Mental Health
- Long Term Conditions
- Maternal and Child Health
- Disabilities
- Cancer and cancer prevention

A close-up photograph of a woman with dark skin and curly hair, wearing a yellow top, smiling warmly as she holds a young child. The child, also with dark skin and curly hair, is laughing joyfully with their hands near their mouth. The background is softly blurred, showing another person in a light blue shirt. The overall mood is positive and affectionate.

Innovator guide: Real-World Evaluation

This simple guide is designed to help innovators in gathering real-world evidence to support scale up and spread of their ideas. It clarifies the Real-World Evaluation process for health and care innovators and offers useful tips on best practice.

Access the guide: www.ahsnnetwork.com/rwe-guide

A connected 'network of networks' providing:

- Support to innovators
- Help to navigate the NHS
- Signposting to resources
- Market access studies and research
- Developing a value proposition
- Evaluating real-world impact
- Health economic reports / business cases
- Implementation support and advice for adopting organisations
- Grant funding opportunities
- Product development

The AHSN's Role

Improving Health

**Reducing costs
for the NHS**

**Driving growth and
securing jobs**

The Innovation Pathway

The AHSN Network

Working with AHSNs

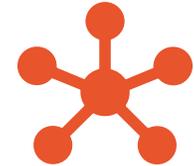

Identifying and understanding unmet needs

Identifying potential solutions with market analysis and due diligence

Supporting RWE and implementation of technologies

Sharing examples of best practice and benefits realisation across wider AHSN network

The AHSN Network

Yorkshire
& Humber
AHSN

The AHSN's support to SBRI Phase 1 applicants

- Intelligence around local and national healthcare priorities and unmet needs
- Market awareness of emerging innovation and where there are gaps
- Stakeholder engagement with regional experts to ensure that innovation align with key unmet needs
- Product review and development, including evidence and regulatory environment
- Review of commercialisation plans/business model
- Review of spread and scale approach
- Contributing to improvements in patient care in key priority areas.

Acceptability

For 'fun and engaging'

Hints & Tips

- Start early
- Think about your project and your Company's timelines – how will this make an impact to your Company and your customer?
- Well-rounded team
- Ethics and administration procedures
- Partners on board?
- IP – who does it belong to?
- Patient and Public Involvement (PPIE)
- Healthcare economics
- AHSN involvement
- Other organisations e.g. charities
- Due diligence
- Next steps after grant

An elderly man with white hair is sitting in a wheelchair, wearing a VR headset and holding a controller. He is smiling and pointing upwards with his right hand. The background is a bright, indoor setting with a potted plant and a window.

**Making stroke survivors
smile again**

Assessment process and how to apply

Luis Tojo

Senior Programme Manager, SBRI PMO

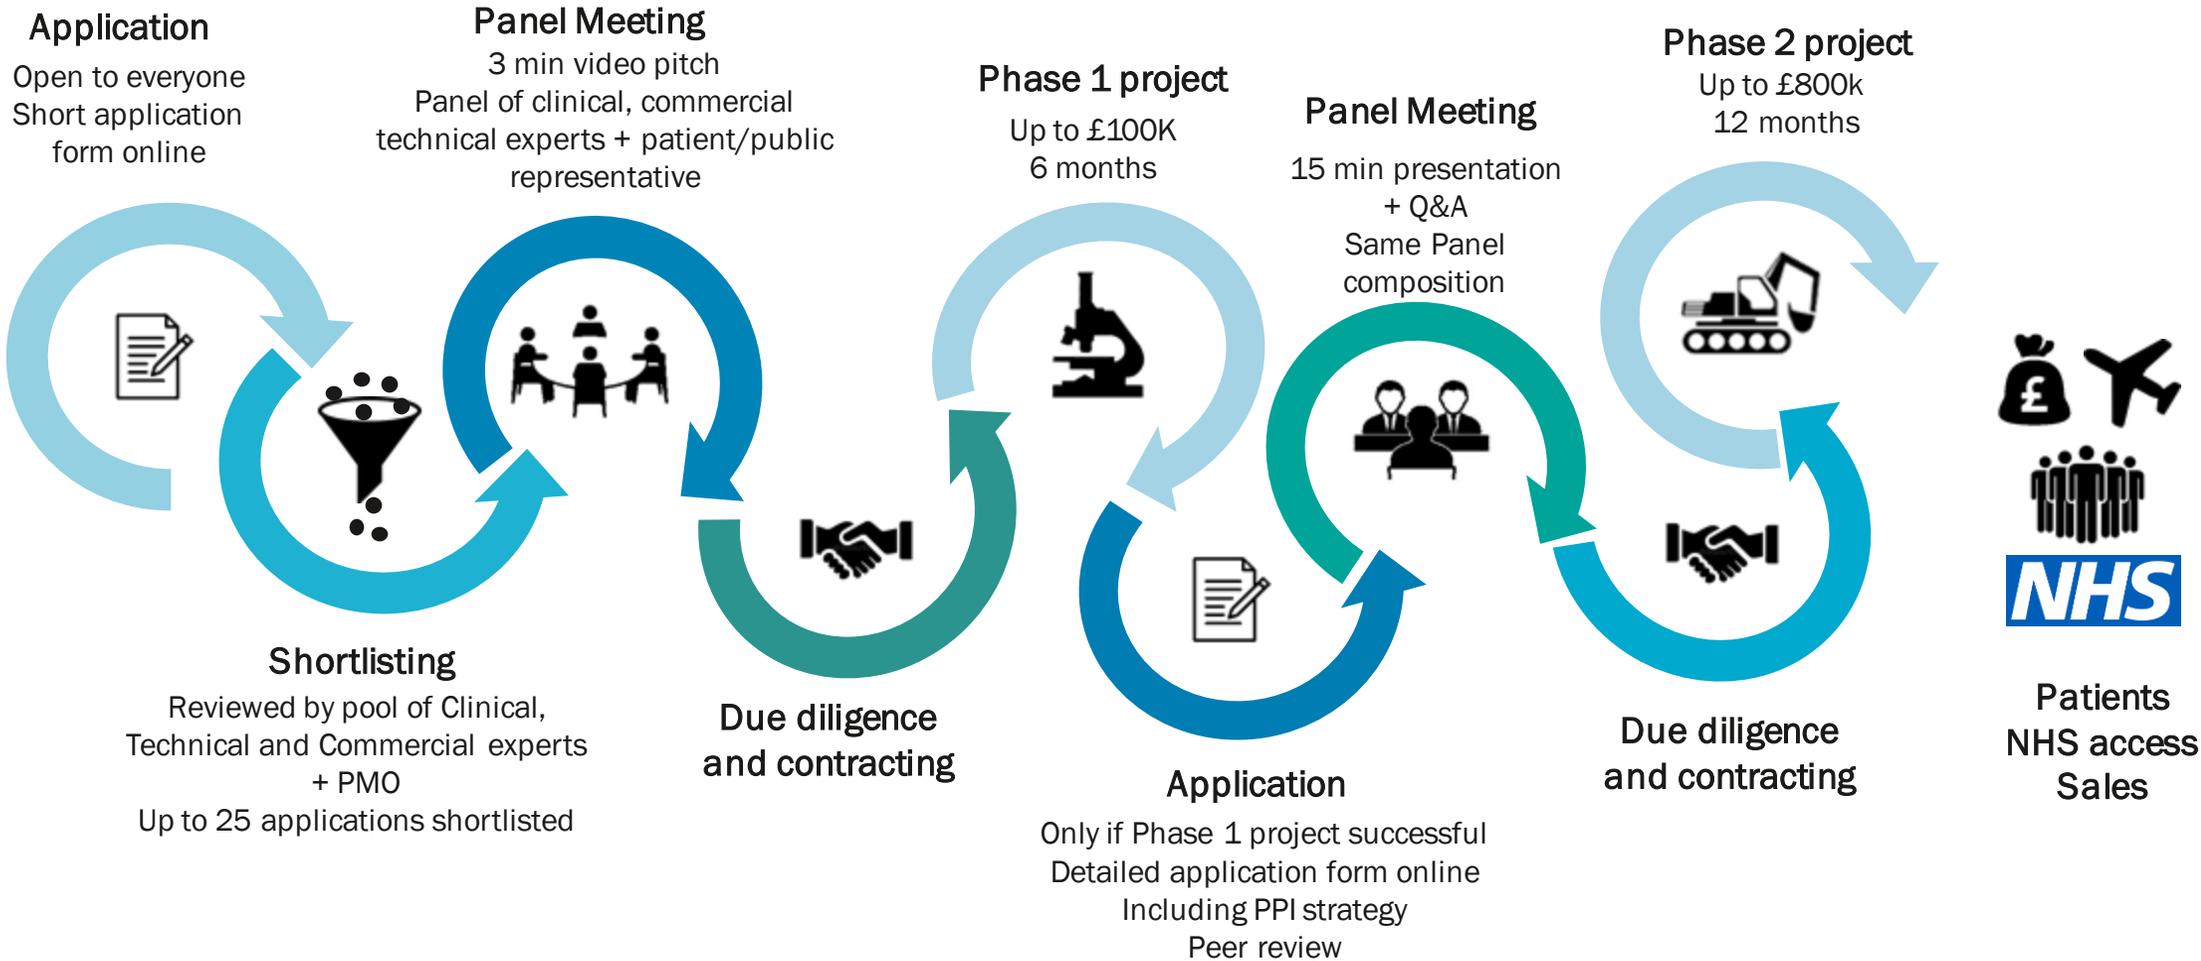

@AACInnovation

*The***AHSN***Network*

Phase 1 and Phase 2 assessment process

Problem identification & articulation of clinical need

NHS Long Term Plan, Strategic papers, KOLs, Industry, AHSNs, Patients

The assessment criteria

1. How well does the application address the challenge brief and does the proposed solution benefit patients, the NHS and/or Social Care Sector and the wider market? 20%
2. Are the project plan, deliverables and risk mitigation strategy appropriate? 15%
3. Is the product innovative, will it have a competitive advantage over existing and alternative solutions and are the arrangements surrounding the use and development of Intellectual Property appropriate? 15%
4. Does the proposed project have appropriate commercialisation and implementation plans? 15%
5. Does the proposed innovation have potential to enhance equity of access and does the project include consideration towards patient and public involvement? 10%
6. Does the proposed technology have potential to contribute to net-zero emission? 5%
7. Do the host organisation and project team appear to have the right skills and experience to deliver the project? 15%
8. Are the costs justified and appropriate? 5%

There are a number of **online guidance prompts** (marked as a ?) available to you throughout the online form to help you when completing an application. It is **strongly advised** that you also read the relevant **Guidance for Applicants** before completing your application.

Please keep the use of acronyms to a minimum. Only use acronyms where a term is used frequently throughout the application. If you do choose to use an acronym, do not assume that the reader knows what it means, and be sure to define it when first used.

You are strongly advised to structure the longer sections of the application form (particularly the Project Description and Breakdown) in such a way that they can be read easily by reviewers. **The use of long passages of dense, unstructured text should be avoided.**

Schematics, tables, illustrations, graphs, and other types of graphics can be embedded to clarify the project plan but they should not clutter the central narrative. Images do not count towards the overall word count but inclusion of them to overcome word limits is not permitted. Images may only be included within the Project description and breakdown. **Images included in other sections will be removed from the application and not seen by reviewers.**

Members of the project team will need to be invited through the RMS *via* email to participate as team members, after which they must both **confirm and approve their participation**. Please ensure that all team members invited to collaborate on this application have confirmed their involvement and approval of the application form content before submission.

Although confirming and approving an application can be done at any time during the submission of an application, you are strongly advised to do this well in advance of the deadline.

If you have any queries with your application, you can contact the SBRI Healthcare Programme Management Office on 020 8843 8125 or SBRI@LGCGroup.com.
